QUALITY GOALS

The company and all employees strive to achieve the maximum quality level and to deliver the right product on time.

In plain text, this means being on a delivery security of 95% or better. Complaints and errors 7 units / customer per 1 year.

Monitoring takes place at monthly meetings and if we have disturbances, we must prevent this depending on what is causing the disturbance.

Monitor helps with production planning, and we see what occupancy our machine park has, this gives us the right tools to ensure deliveries to customers.

All deviations are registered in Monitor.
